

# A lifetime of tinnitus relief

Tinnitus Pro is a comprehensive solution that offers your patients access to personalized, science-based tinnitus therapy.

## PERSONALIZED SOUND THERAPY

### Habituation

Makes the ringing less noticeable, accentuating the tinnitus tone against a backdrop of soothing soundscapes, based on Tinnitus Retraining Therapy.

### Adaptation

Supports reduced loudness over time, based on notched-noise therapy that removes energy at the tinnitus frequency.

### Relief

Provides fast, below-tinnitus-level masking for short-term comfort during spikes or stressful moments.

### Sleep

Reduces tinnitus-silence contrast to ease sleep onset and maximizes time spent on sound therapy when patients' minds are most open to habituation.

### Cognitive Behavioral Intervention

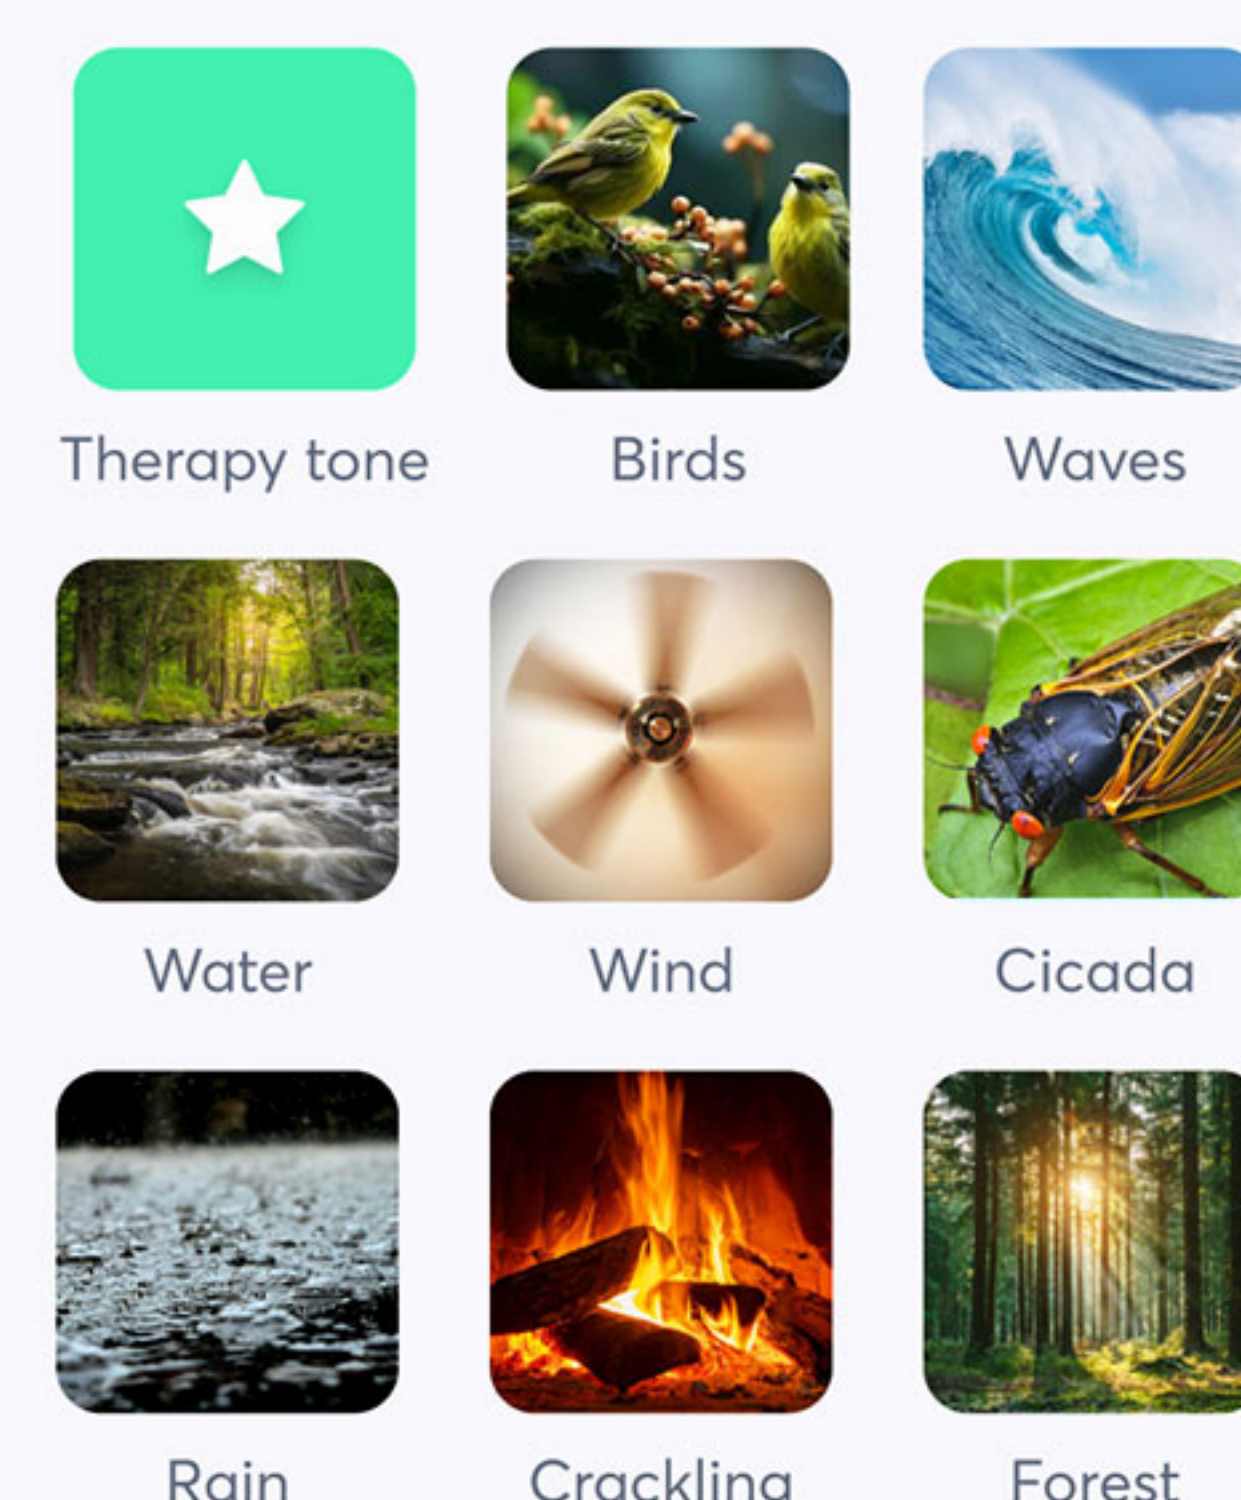

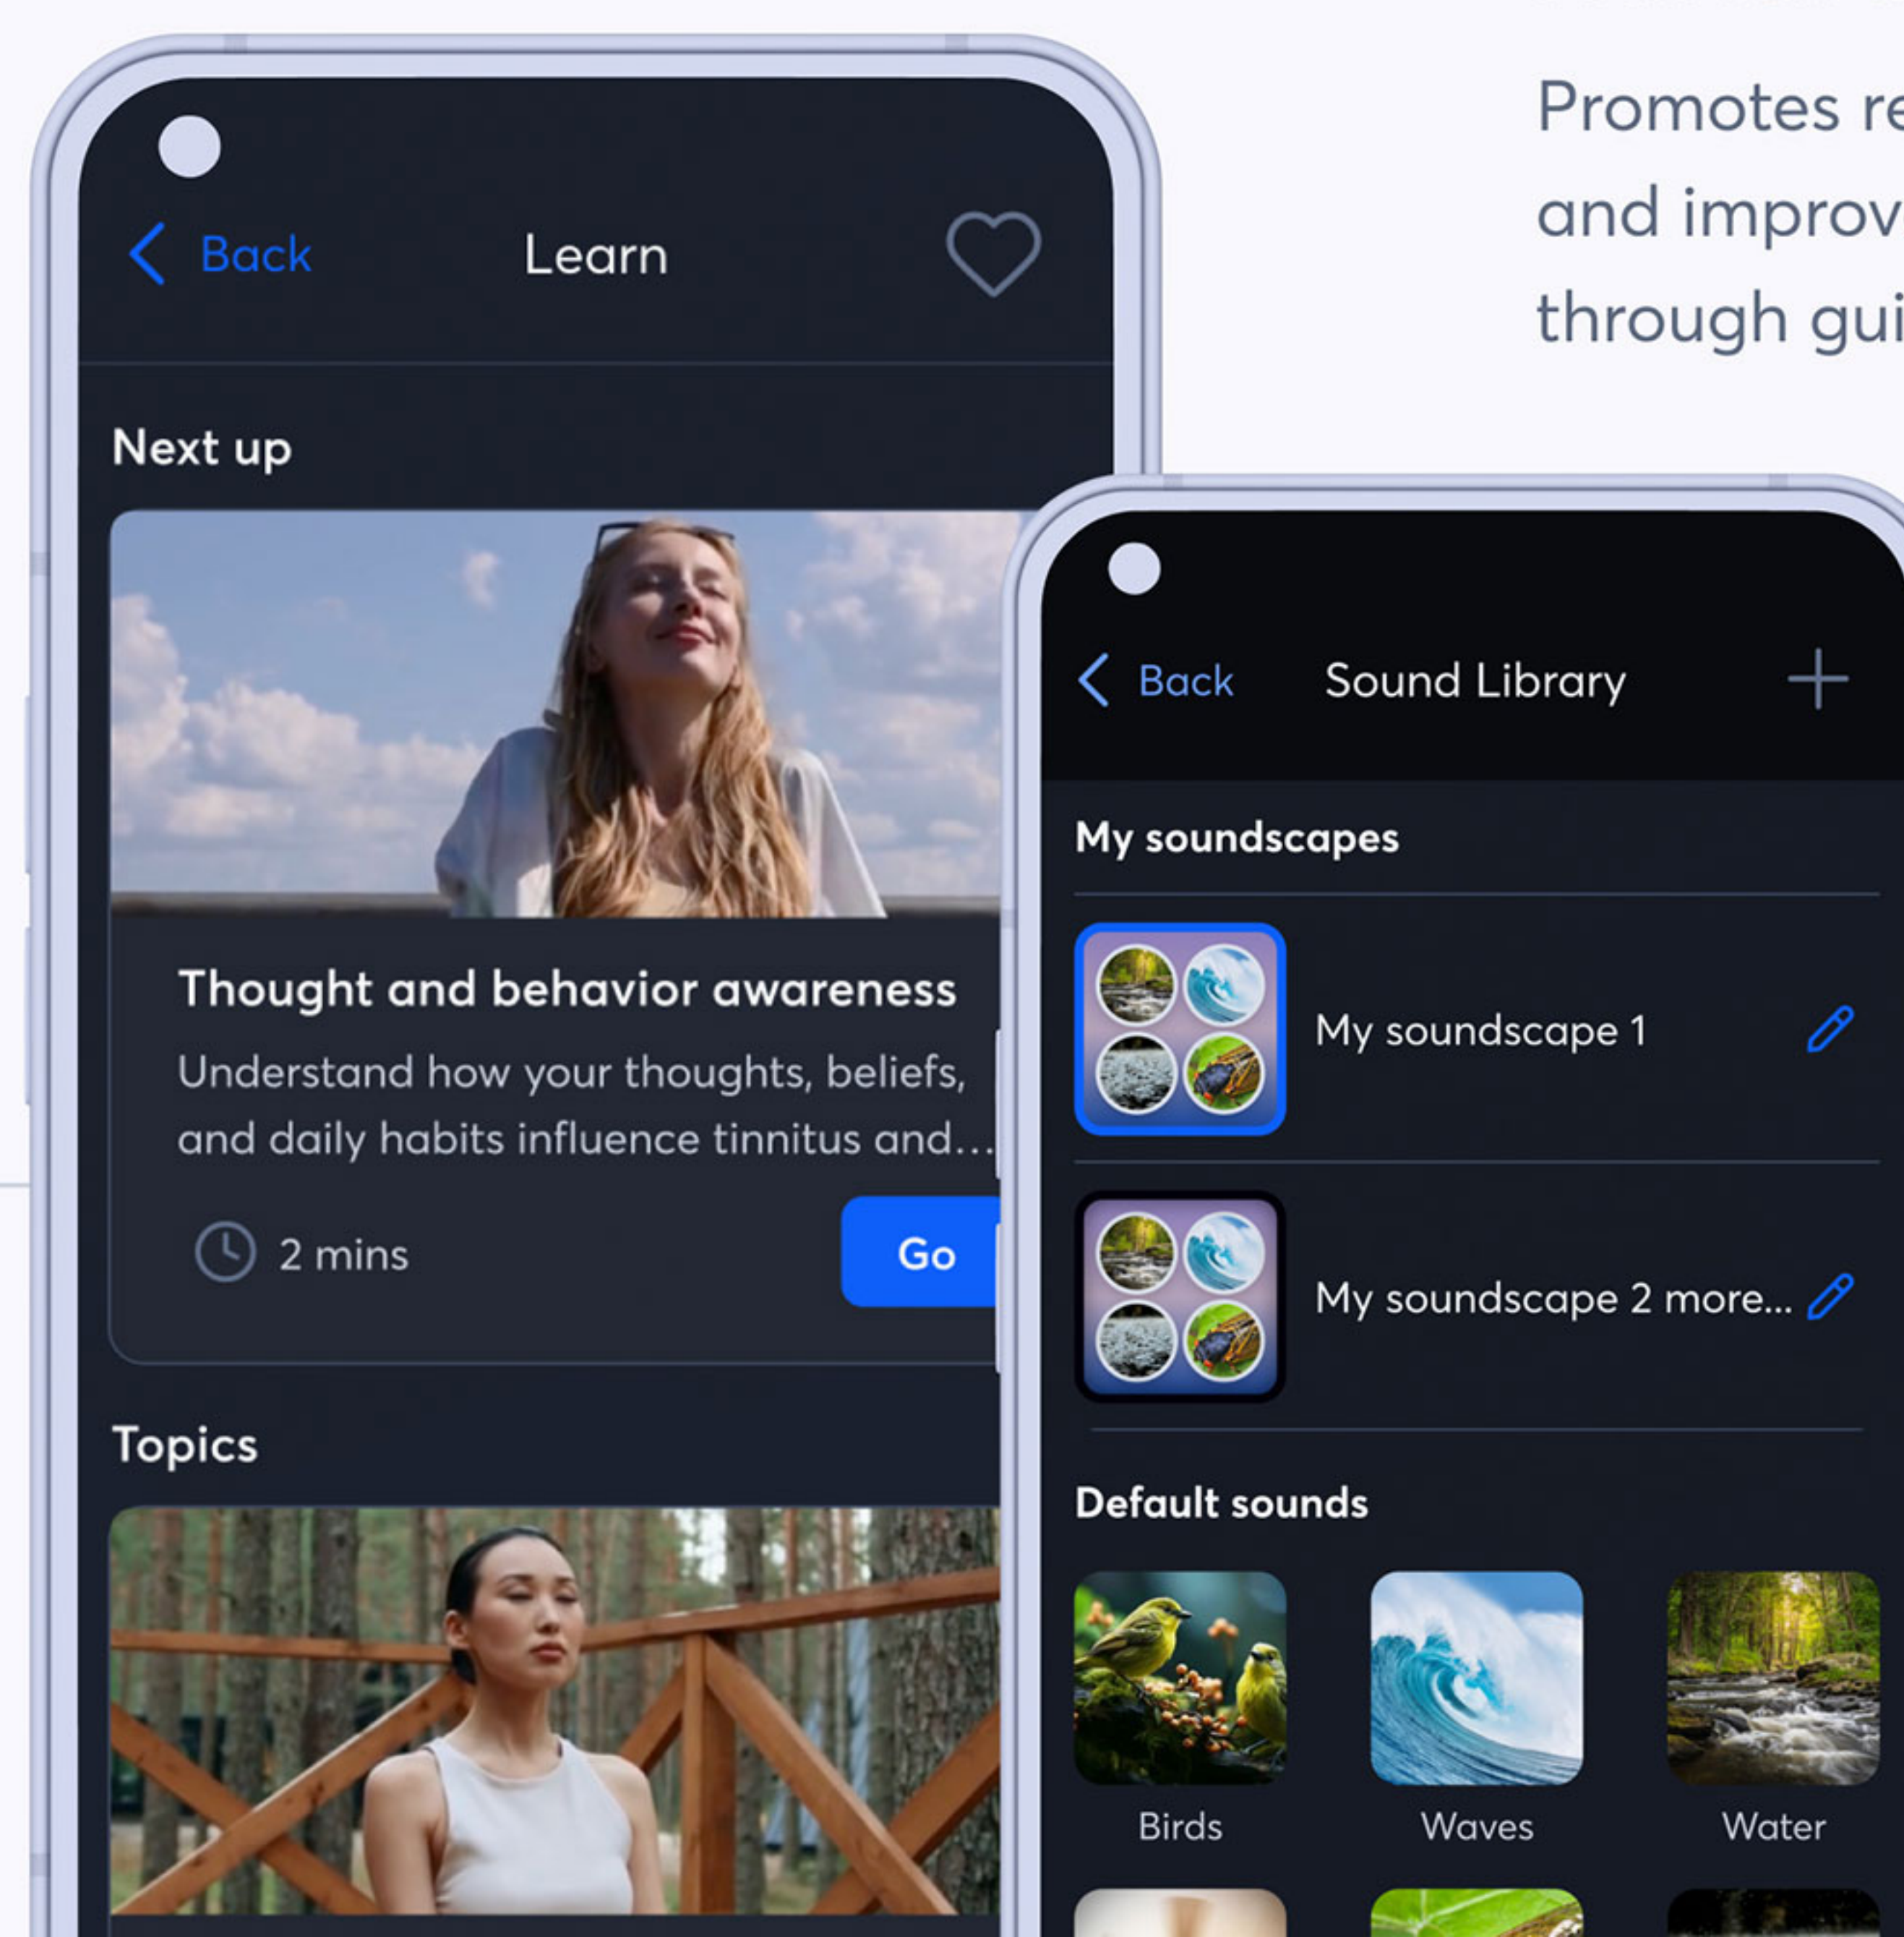

Helps reframe reactions, lower distress, and build coping strategies, with lessons developed by Drs. Robert Sweetow and Nancy Tye-Murray.

## MEDITATION & MINDFULNESS

### Meditation and mindfulness tools

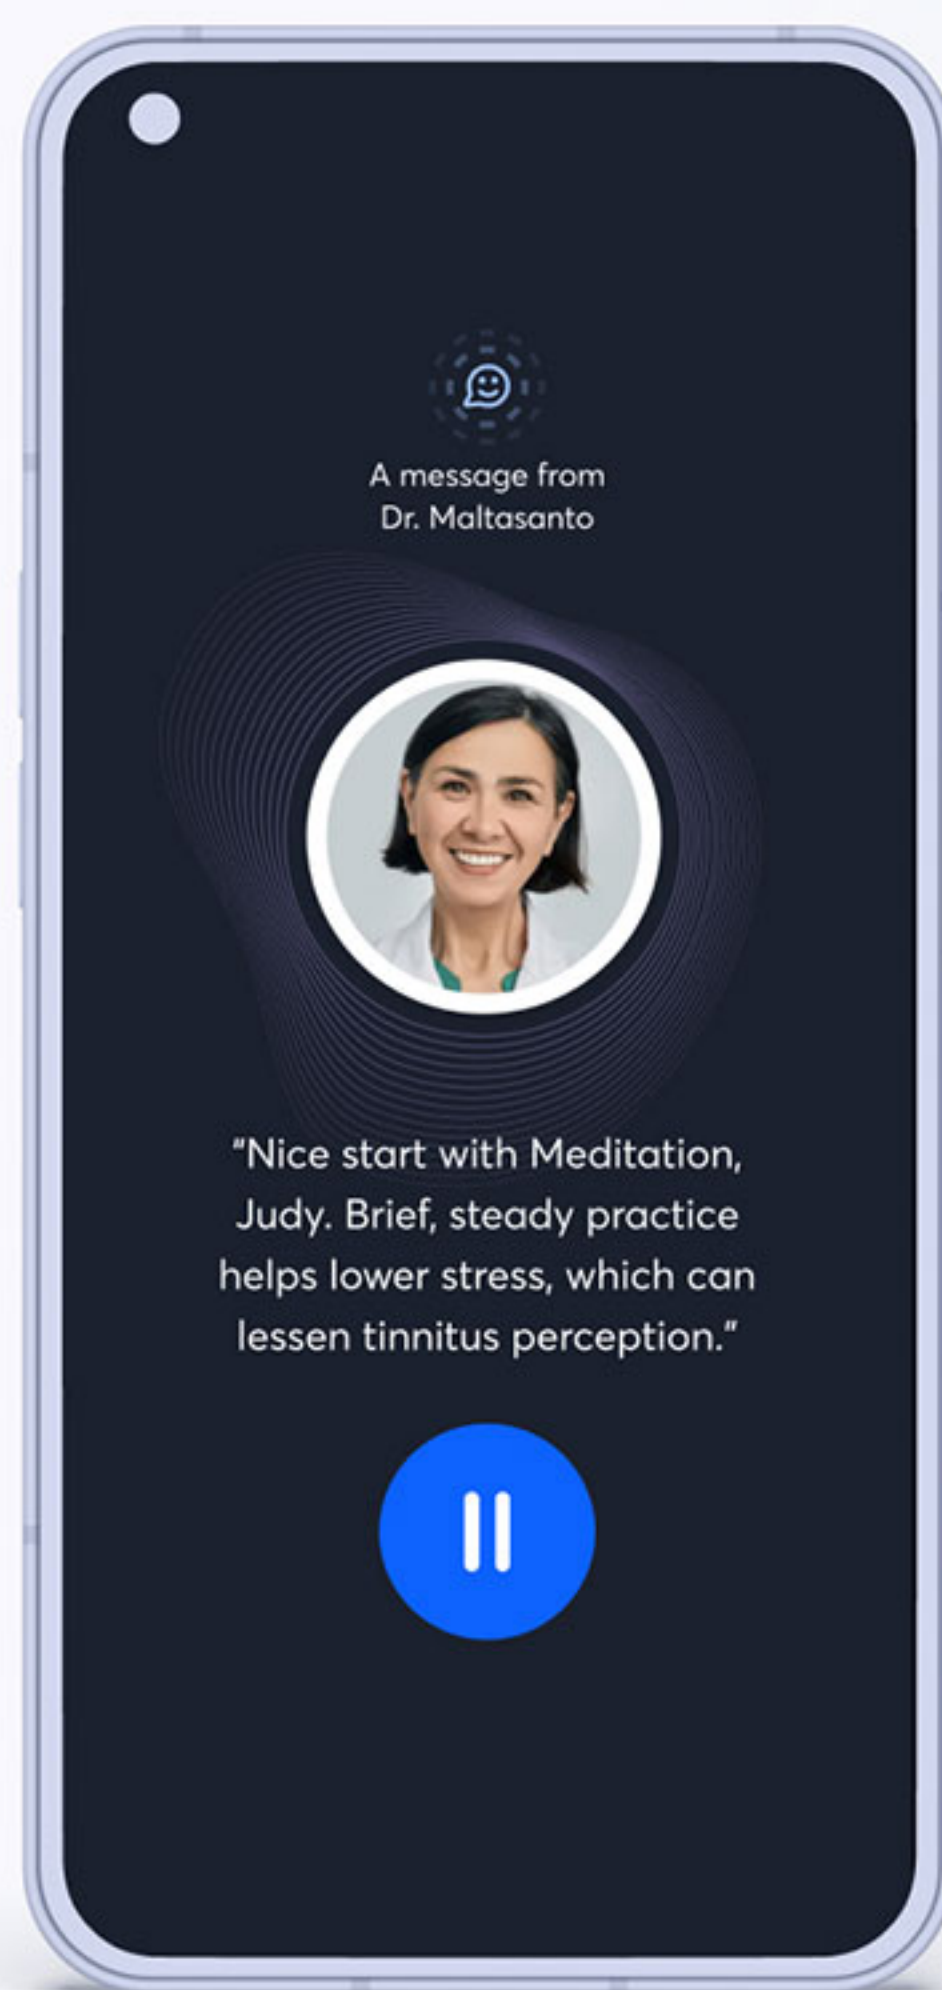

Promotes relaxation, stress reduction, and improved tinnitus acceptance through guided exercises.

Choose from many soothing sounds

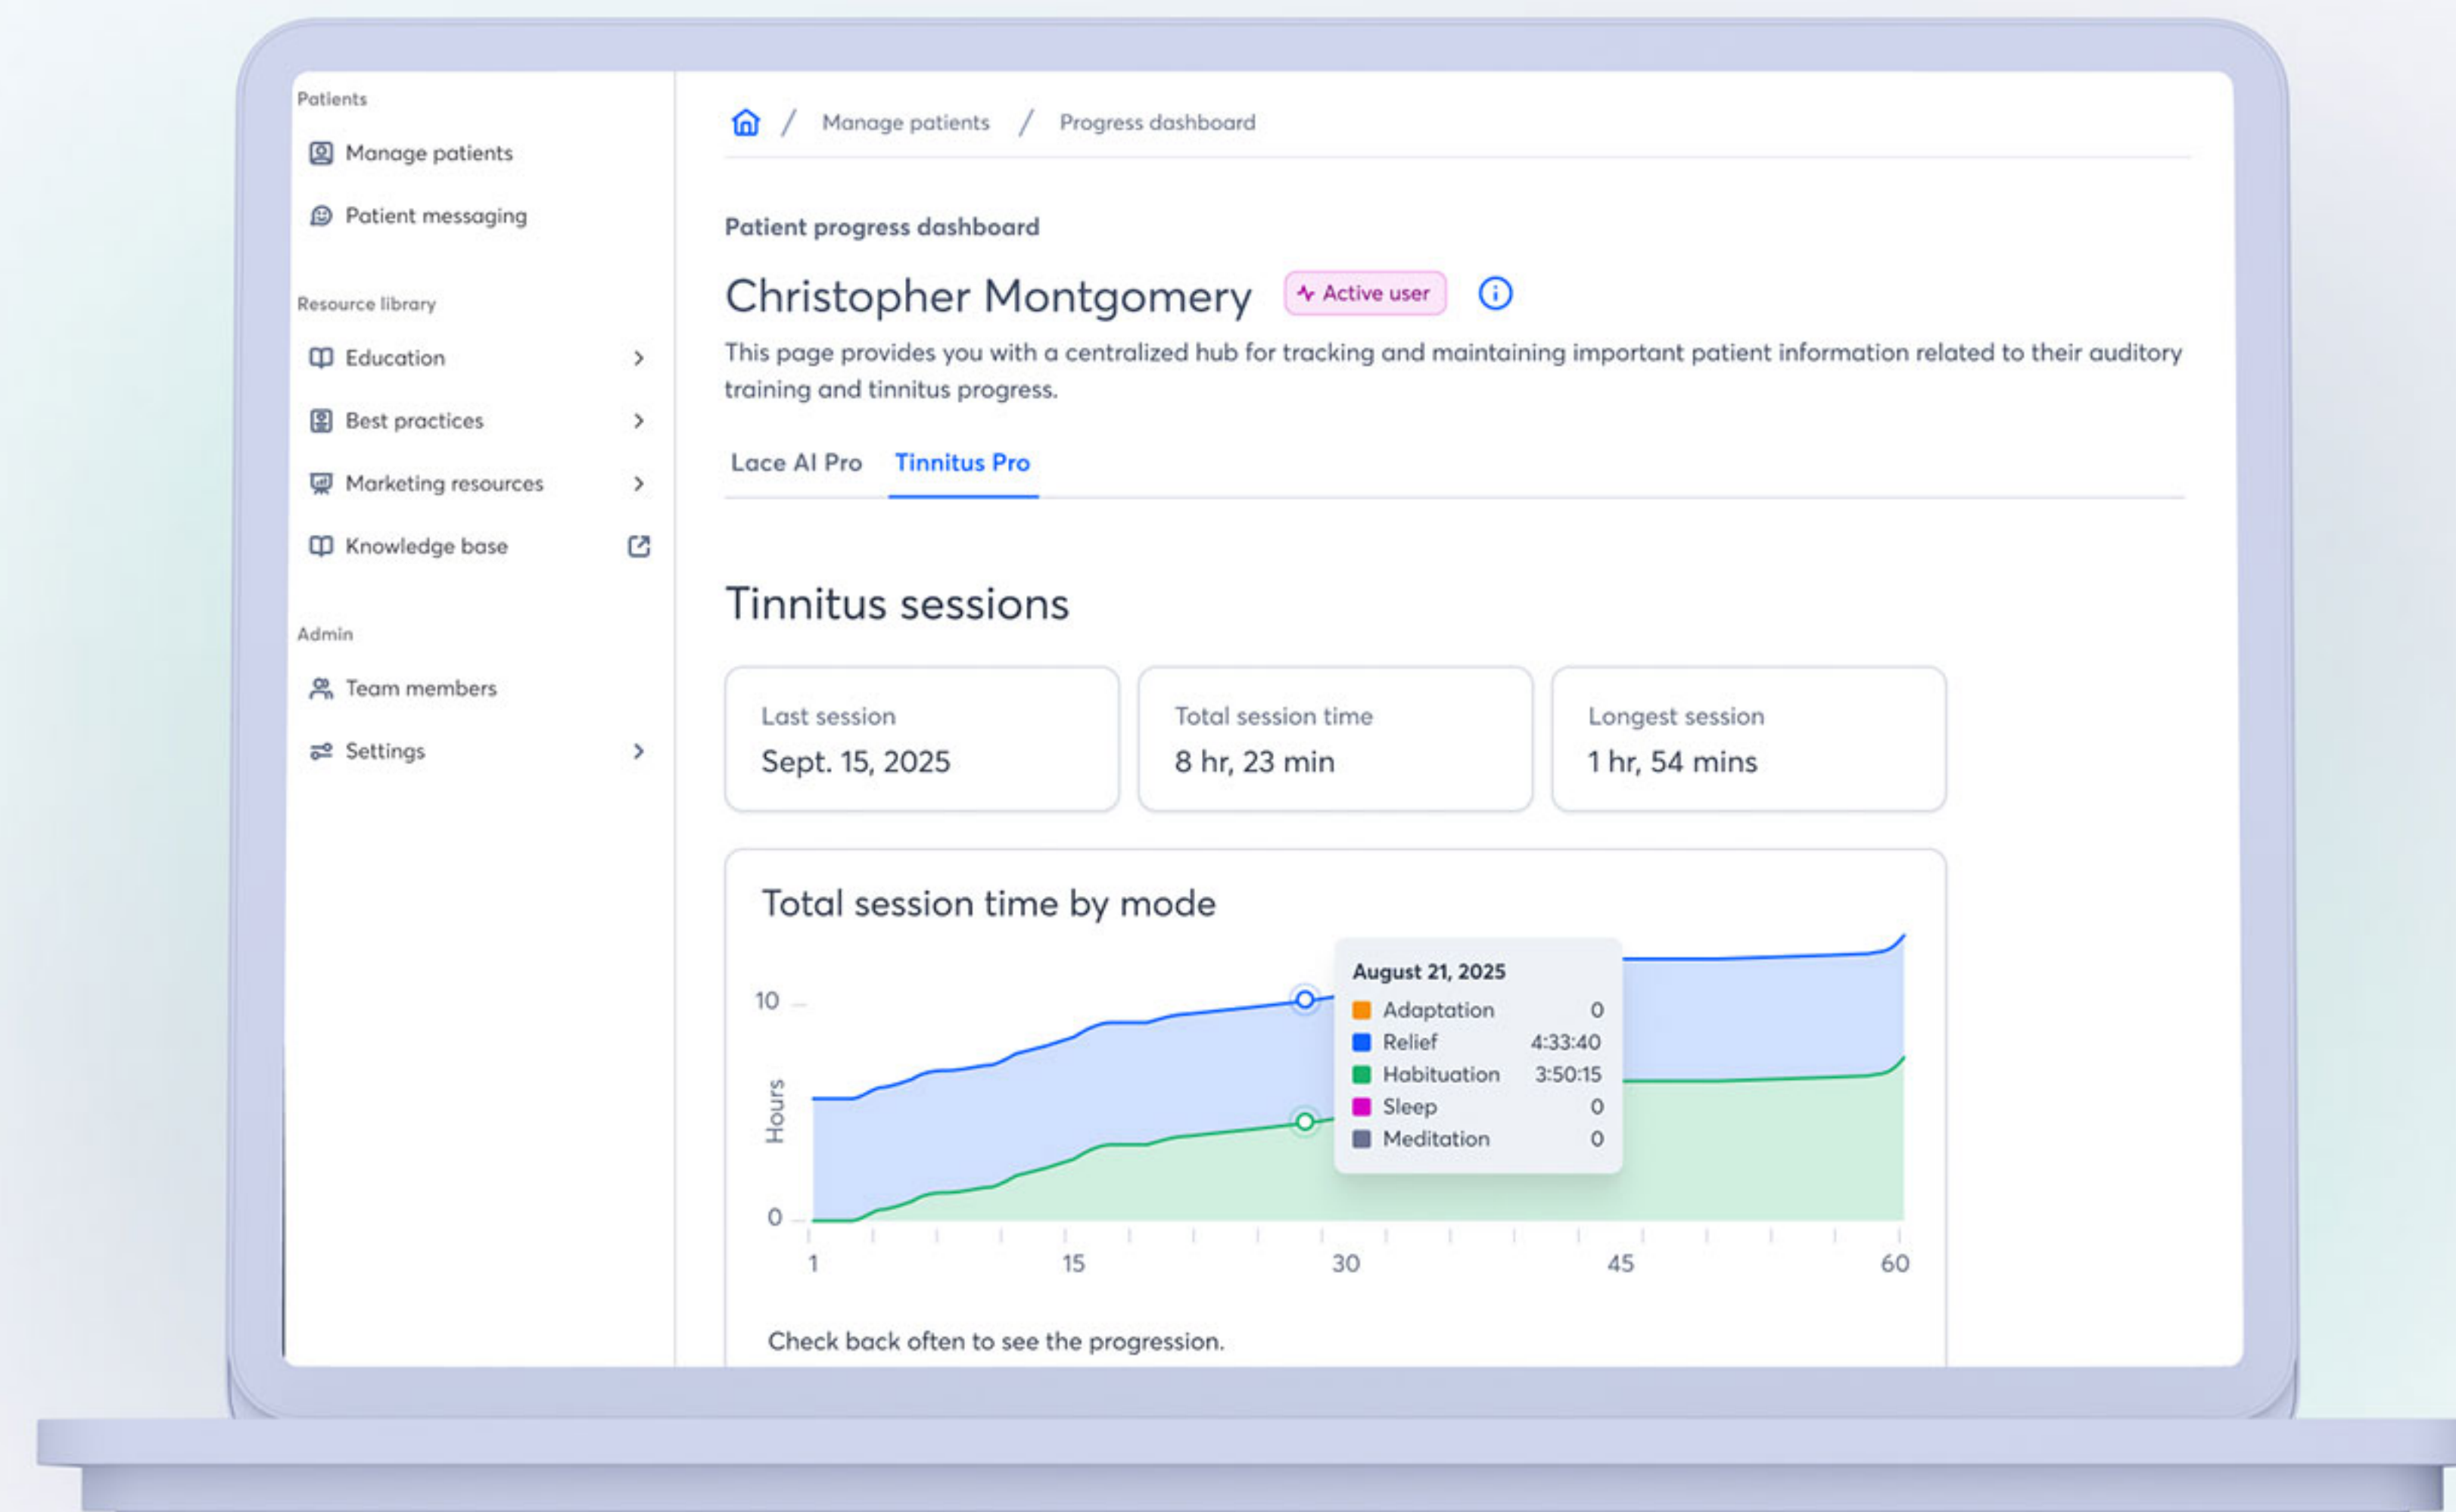

# Why practices choose Tinnitus Pro

Patient-led tinnitus care that drives significant revenue.

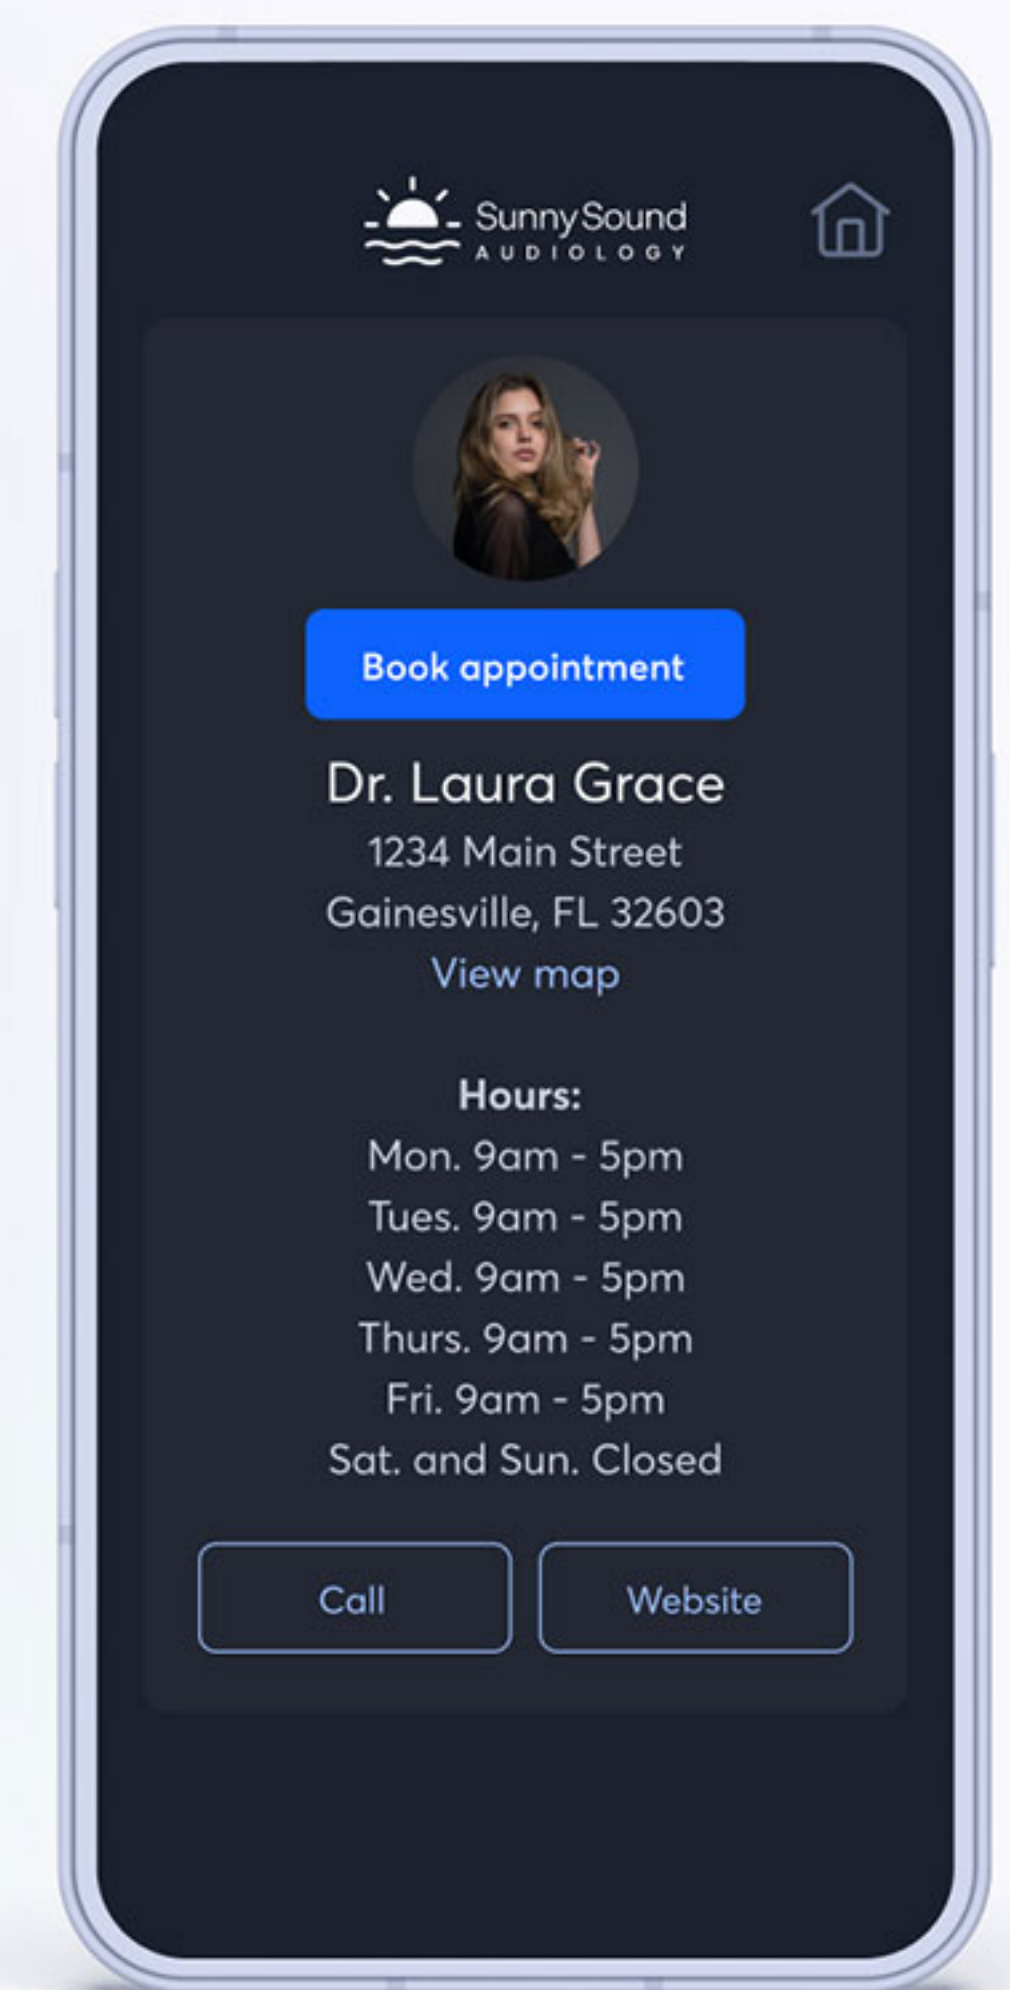

## Automated Patient Messaging

Patients receive timely encouragement using your name, image, and/or voice.

## Patient monitoring

Easily view patient usage and survey results from one dashboard.

## Practice personalization

Connect patients to your practice with custom branding and appointment scheduling.

## Unlimited Licenses. Real Revenue.

One monthly fee gives you unlimited patient licenses. You control pricing for Tinnitus Pro, generating revenue to build a healthier, more profitable practice.

 *Your tinnitus tool is amazing. I've never seen anything like Tinnitus Pro."*

— David Keenan,  
Affordable Hearing Store

## Bringing tinnitus patients to your practice.

With your practice on our Clinic Locator Map, patients actively searching for tinnitus support are directed to your clinic.
